Art Unit: 3652

Drawings

The drawings are objected to because some of the figure headings are spelled wrong (for example "Figur 1" should be "Figure 1"). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Art Unit: 3652

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,3,4,6,7,10,11,13,17-19,21,22,24,25,28,29,31, are rejected under 35 U.S.C. 102(b) as being anticipated by Laurent (US 6,378,888).

Re claim 1, Laurent teaches a low ground pressure skid 10 for carrying heavy loads comprising:

A. a frame 12 said frame having a bottom;

B. a base panel 19 connected to said bottom of said frame;

C. wherein said frame and said base panel reduce pressure and allow the skid to be moved;

D. a bed 11 having a bed connection point 29,39;

E. wherein said bed connection point is connected to one of the items selected from the group consisting of said frame 12 and said base panel 19;

F. a tongue 21 having a tongue connection point 24 (etc.); and

G. wherein said tongue connection point 24 (etc.) is connected to one of the items selected from the group consisting of said frame 12, said base panel 19, and said bed 11.

Re claims 3,4,21,22, Laurent teaches an end dump bed (figures 2-3).

Re claims 6,24, Laurent teaches the bed being a flat bed (top, bottom).

Re claims 7,25, Laurent teaches a sliding hook 24 (25).

Re claims 10,28, Laurent teaches a (relatively) quick hitch connector 21.

Re claims 11,29, Laurent teaches an angled frame outside wall.

Re claims 13,31, Laurent teaches a rectangular frame 12.

Art Unit: 3652

Re claim 17, Laurent teaches one or more base supports (see figures 1-4).

Re claim 18, Laurent teaches one or more bed supports (see figures 1-4).

Re claim 19, Laurent teaches a low ground pressure skid 10 for carrying heavy loads comprising:

A. a frame 12 said frame having a bottom;

B. a base panel 19 connected to said bottom of said frame;

C. wherein said frame and said base panel reduce pressure and allow the skid to be moved:

D. one or more base supports (see figures 1-4) connected to said frame 12 and said base panel 19;

E. one or more bed supports (see figures 1-4) connected to said frame 12 and said base supports;

F. a bed 11 connected to said one or more bed supports; and

G. a tongue 21 having a tongue connection point 24 (etc.);

H. wherein said tongue connection point is connected to one of the items selected from the group consisting of said frame, said base panel, and said bed.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Art Unit: 3652

Claims 2,8,20,26, are rejected under 35 U.S.C. 103(a) as being unpatentable over Laurent (US 6,378,888) in view of Haggard (US 2,870,928).

Re claims 2,20, Laurent does not mention an adjustable tongue. However, Haggard teaches an adjustable tongue in order to lower the skid. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified Laurent by the teaching of Haggard to have an adjustable tongue in order to lower the skid.

Re claims 8,26, Laurent does not mention a retractable wheel unit. However, Haggard teaches a retractable wheel unit in order to lower the skid. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified Laurent by the teaching of Haggard to have a retractable wheel unit in order to lower the skid.

Claims 5,23, are rejected under 35 U.S.C. 103(a) as being unpatentable over Laurent (US 6,378,888) in view of Banks (GB 2,169,248).

Re claims 5,23, Laurent teaches a dump bed but does not mention a side dump bed. Banks teaches a side dump bed. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified Laurent by the general teaching Banks to have a side dump bed in order to allow greater versatility in use.

Art Unit: 3652

Claims 9,27, are rejected under 35 U.S.C. 103(a) as being unpatentable over Laurent (US 6,378,888) in view of van der Lely (US 4,362,340).

Re claim 9,27, Laurent does not mention a 3 point hitch connector. However, van der Lely teaches a 3 point hitch connector in order to allow connection to devices that have 3 point hitch connections. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified Laurent by van der Lely to have a 3 point hitch connector in order to allow connection to devices that have 3 point hitch connections.

Claims 12,14,30,32, are rejected under 35 U.S.C. 103(a) as being unpatentable over Laurent (US 6,378,888) in view of Bombardier (US 3,149,738).

Re claims 12,30. Laurent does not mention a curved outside frame wall. Bombardier teaches a curved outside frame wall 3. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified Laurent by the general teaching of Bombardier to have a curved outside frame wall in order to enhance safety by not having sharp edges.

Re claims 14,32, Laurent does not mention an oval outside frame wall. Bombardier teaches an oval outside frame wall 3. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified Laurent by the general teaching of Bombardier to have an oval outside frame wall in order to enhance safety by not having sharp edges.

Art Unit: 3652

Claims 15,33, are rejected under 35 U.S.C. 103(a) as being unpatentable over Laurent (US 6,378,888) in view of Good (US 4,890,560).

Re claims 15,33, Laurent does not mention a circular outside frame wall. Good teaches a circular outside frame wall (see figures). It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified Laurent by the general teaching of Good to have a circular outside frame wall in order to enhance safety by not having sharp edges.

Claims 16,34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Laurent (US 6,378,888).

Re claims 16,34, Laurent does not mention a square frame although Laurent does teach a rectangular frame which just an elongated square. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified Laurent to have to have a square frame in order to allow the skid to fit into a smaller storage space.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Korenek (US 5,158,418) teaches an angled skid.

Mayfield (US 6,520,521) teaches a curved frame.

Bumgarner (US 5,809,907) teaches a square, curved skid.

Art Unit: 3652

Drost (US 2002/0187021) teaches a push dumping skid.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to M. Scott Lowe whose telephone number is (571) 272-6929. The examiner can normally be reached on 6:30am-4:30pm M-Th.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eileen Lillis can be reached on (571) 272-6607. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
